

# Wrought Iron Product Care and Knowledge

Wrought Iron Furniture and other related decor available from 4seasons4u is made with the intent to satisfy and last a lifetime. However, to properly care for your products after your purchase requires some care and maintenance to keep your items in new condition. We will try to answer all of your questions here and teach you how to care for your furniture and accessories. If you should have a question about something not covered or would like to make a suggestion, please feel free to contact us. The fastest and easiest way to do that is to email us at [info@4seasons4u.co.za](mailto:info@4seasons4u.co.za) or phone us 0788026329.

**Wrought Iron:** Our products are built using hot-rolled which produce some scaling on the finished texture. The traditional techniques of forging, bending, cutting, and welding, leave tool marks on the metal. These discernible marks and variations in the iron are the characteristics of truly handcrafted iron and make each piece distinctly unique. Some products especially the more modern looking pieces are finished to be smooth and look more refined, no product will disappoint we guarantee that. To maintain the beauty and luster of your iron furniture and accessories we recommend a regular buffing with a soft, lint-free cloth and an occasional application of furniture wax to clean and maintain the finish.

**Finish:** We offer different options for the finishing for your products. We use durable steelcoat paint from Devcoat (pty) LTD t/a Varcol Paints in Centurion.

This paint has a 2 in 1 function to prevent rusting. It is available in different colours, but the most popular one is our antique rustic finish. We Spraypaint the item with Steelcote Black and then hand apply it with 4seasons4u brown steelcote. The brush is kept as dry as possible.

Because most of our products are for outdoor use, the brightness will disappear during time.

A powder coat finish is also available in the colours you need. We have a sub-contractor (Nulane) close to our yard who does this for us.

**Wood:** We use Rhodesian teak ( if available) as deck for our Hardeman , Roman and Roman large bridges.( <http://www.4seasons4u.co.za/pg/62291/br3-bridge-%22roman%22-large> ) . The wood we use is premium cut and pre inspected for quality. Each piece finished with a sealer (Silkwood) to prevent cracking There is a pleasing quality in woods' natural characteristic so we allow some grain and color variations, and an occasional knot to accentuate the woods individual beauty. To maintain the beauty and luster of the wood we recommend to apply a sealer every 2-3 months.
